

Internet Use and Access

Internet access is available to qualifying students. These services include access to electronic resources from UtahLink, the educational network supported by the Utah Educational Network (UEN), and the Washington County School District. Our goal is to promote innovation and educational excellence by using Internet tools for research, worldwide resource sharing, and communications.

With access to the Internet comes material that is not considered educational in the context of the school setting. The Internet contains material that is objectionable from many points of view. There is, however, a wealth of educational material available as well. Parents and guardians need to decide whether to permit their children to access the Internet.
