

Washington County School District

WIRELESS NETWORK ACCESS

You may have noticed a significant change in the wireless networks that are now available while in Washington County School District. Due to security risks all open and unauthenticated wireless networks have been retired. The following document will explain how to obtain network access for employees, students and visitors.

1ST

Turn on your computer and connect to the wireless network **WCSDsignon**. Once you are connected, open a web browser

(OR)

Use a computer that is already connected and go to **<https://signon.washk12.org>**

At signon.washk12.org you can register for an account to use the network. Students and Employees need to use their full email address "first.last@washk12.org" ONLY when registering

FOLLOW THE PROMPTS TO CREATE YOUR ACCOUNT

ONCE YOU CREATE YOUR ACCOUNT ON SIGNON, IT IS PERMANENT. YOU WILL NEVER NEED TO REPEAT THIS STEP AGAIN.

2ND

Connect to the wireless network **WCSDaccess**

Use the credentials you just created at signon.washk12.org to authenticate

EMPLOYEE OR STUDENT?

Your username is your email without the @washk12.org

FOR EXAMPLE

"abe.lincoln@washk12.org" would use "abe.lincoln" for his username

(Your password is the same - and will be synchronized with the District Google Mail)

VISITOR?

Your username is your cell phone number (with the area code & dashes)

FOR EXAMPLE

435-673-3553

(Your password will be text messaged to you)

Important Notes

No internet access will be given on WCSDsignon, it is for network registration only

WCSDaccess uses WPA2, AES Encryption with 802.1x Authentication using the PEAP & MS-CHAP protocols.
